

Old Towne Disclaimer

Old Towne 2 1/3x10 is recommended to be installed with 5/32" (1 cm) grout joint to emphasize the material's characteristics. Therefore, the Retail selling price of each carton (6.25 square feet per carton) is calculated including the joint surface of 5/32" (1 cm), the optimal joint size to achieve a realistic "mortar" joint appearance. Use of a smaller grout joint will require additional material to cover the same installation area.
